- *Redefine your brand... through enhancement*

DRUG DELIVERY SYSTEMS

Oral Thin Films

ARx, LLC custom formulates and manufactures drug-loaded oral thin film (OTF) designed to dissolve pre-determined rate when introduced to saliva for absorption in the GI tract. OTFs are a beneficial means for administering treatments and improving compliance in pediatric, geriatric, veterinary and compromised patient populations. The convenience of this dosage form also allows for quick administration while the patient is on the go.

As innovators of the dosage form, ARx leverages over 10 years of OTF formulation and production experience to partner with clients in pursuit of OTC, ANDA and NDA product launches.

Experience the ARx benefits for
your **drug**, your **patient** and your **brand**...

<i>Your Drug...</i> Formulation	<i>Your Patient...</i> Convenience	<i>Your Brand...</i> Enhancement
Rapid disintegration time for fast drug release	Variety of flavors and taste-masking options	Market success through enhanced compliance
Tailored dissolution time and drug release in specific fluid or pH	Comfortable and discrete during dosing	Novel dosage form for product line extension
Variety of GRAS excipients available	Eliminates the need to swallow medication	Customized size, shape, color and thickness
Single or multi-layer systems for stability, bioavailability and API compatibility	Easy to transport and administer
